CAMBRIA AND BRETON MAKE MAJOR AGREEMENT ON QUARTZ TECHNOLOGY FOR UNITED STATES EXCLUSIVITY

*Cambria to Invest \$45 Million Expanding Company;
Popularity of Quartz Surfaces in United States Leads to Major Expansion*

Le Sueur, MN (February 5, 2007) — Cambria announced today that it is expanding its capacity and will remain the exclusive processor of natural quartz surfaces in the United States.

Through an expanded partnership with Breton S.P.A., the Italian company that developed quartz processing technology, Cambria will secure its exclusive right to use Breton's technology in the United States through 2012. Cambria has used Breton technology since 2001, when the company first began processing quartz in Le Sueur, Minn. All other quartz surface companies process their product abroad.

"This is a major move for both companies and we are pleased to have further established the U.S. exclusivity of this unique and world-leading technology with Breton," said Martin Davis, Cambria's Chief Executive Officer and President. "Breton S.P.A. and the Toncelli family are the world leaders in the technology surrounding quartz surfacing and other stone materials. We are pleased to be their only United States technology partner."

The expanded partnership will allow Cambria to continue its aggressive growth strategy, meet growing consumer and commercial demand, and expand its fabrication, installation and retail network. Since 2001, demand for natural quartz surfacing has rapidly increased. According to The Freedonia Group, an independent company researching the United States kitchen and bath industry, quartz continues to grow at a rate twice that of all other stone surfaces.

To accommodate Breton's newest and proprietary quartz processing technology, Cambria doubled the size of its facility in Le Sueur to 300,000 square feet. The expansion combined with newer technology will increase Cambria's processing capacity, accelerate its industry-leading color innovation and provide for advancements in quartz slabs and quality processes. Cambria will invest more than \$45 million in the expanded facility and new equipment. This positions Cambria as the leader in the United States quartz surfacing marketplace. There are no other facilities like Cambria in the United States and this assures that Cambria will be the only United States supply well into the future. The company has begun production on the new line and will be operating the completed line later this year. This will more than double the company's sole U.S. supply of quartz surfaces.

"This really secures a strong, quality supply channel for our very important fabricator partners throughout the United States," Davis said.

Cambria is a stain-resistant, non-absorbent stone that is harder, stronger and easier to care for than other stone surface materials. Cambria is food safety certified by the National Sanitation Foundation (NSF) International – there is no safer surface for food preparation available to consumers – and by GREENGUARD Indoor Air Quality as a low-emitting type of building material. Cambria's GREENGUARD certification assists projects in qualifying for points under the United States Green Building Council's (USGBC) LEED® program. In addition, because Cambria is the only producer of natural quartz surfaces in the United States, additional LEED points are available for any project within the 500-mile radius of its production plant in Le Sueur, Minn.

About Cambria

Cambria is a privately held, family-owned company with more than 500 employees. Headquartered in Le Sueur, Minn., Cambria is one of the few quartz surface plants in the world and the only producer of natural

quartz surfaces in the United States. Cambria has a nationwide network of stone fabricator and installation partners that share Cambria's commitment to quality and craftsmanship. These partners have the highest quality stone fabrication facilities in the United States and are a very important part of Cambria's growing position in the United States. Like Cambria, many of these key partners throughout the country are family owned, privately held, entrepreneurial companies who focus on quality, innovation and growth in their respective markets. Cambria is available to consumers via retail partners throughout the United States and Canada. More than 85 percent of Cambria domestic sales are outside of its home state of Minnesota through its key partners across the United States. Cambria also exports its products throughout the world. For additional information about Cambria, or to locate the closest Cambria dealer, call 1-866-CAMBRIA or visit Cambria on the web at www.CAMBRIAUSA.com.

About Breton S.P.A.

Headquartered in Castello di Godego in the province of Treviso, Italy, Breton is the world leader in stone surfaces technology. Breton, like Cambria, is a privately held, family-owned company. Marcello Toncelli, the family patriarch and founder of Breton, is recognized throughout the world as the master innovator and founder of quartz technology. Today his two sons, Luca and Dario, and many long-term employees, run the company and are well-respected in their own right for their technology expertise and innovation. Breton has more than 400 employees and continues to grow their world-leading innovations and position in the stone industry.
